KALINGA INSTITUTE OF INDUSTRIAL TECHNOLOGY
Deemed to be University U/S 3 of the UGC Act, 1956

DEPARTMENT OF TRAINING & PLACEMENT
KALINGA INSTITUTE OF INDUSTRIAL TECHNOLOGY (KIIT)
DEEMED TO BE UNIVERSITY, BHUBANESWAR (ODISHA)

No. KIIT-DU/T&P/26/434 **Date: 5th June'2026**

Kind Attenn: **2027 Graduating B.Tech (All Branches) Students**

This is to inform all the above students that **Pibit.ai** will be conducting an Internship cum performance based PPO Recruitment Drive very shortly in virtual mode.

Interested eligible students are directed to **REGISTER** in the link given below on or before **6th June'2026 by 9.00 AM** to participate for the same.

https://forms.gle/ALnsALvq9fKJ2nVWA

Profile Offered	:	AI Intern
Eligibility Criteria	:	8.00 or above CGPA in B.Tech
	:	No Backlogs
Process	:	To be informed
Stipend	:	Rs. 35,000 per month in hand
Internship Duration	:	12 Months
Internship Location	:	Bangalore, HSR Sector 4
Joining Date	:	Immediate (post selection) and exact date will be Informed
CTC	:	Rs. 10.00 LPA to Rs. 13.00 LPA, performance-based
Mandatory Requirement:		**Candidates must have completed at least one Internship involving Python**

Note:
Post registration students are directed to share their registration status in the link given below on or before **6th June'2026 by 9.00 AM.**

Prof. (Dr.) Prachet Bhuyan
Professor, School of Computer Engineering,
Dean (T&P), & Chairperson (TMS),KIIT-DU

NB: 1. The Company will be shortlisting from the registered students list.
2. Find below the job description for your reference.

Job Description

Pibit.ai is an SF-based insurtech company reconstructing the art and science of commercial underwriting for carriers and MGAs.
At the heart is the CURETM platform, the industry's only centralized underwriting risk environment powered by agentic underwriting services that deliver decision-ready outcomes.

It converts submissions into decisions by automating intake, triage, and data enrichment from documents and external sources while surfacing risk insights that help customers win the right accounts faster, scale throughput, and reduce loss ratios. Backed by Y Combinator, our proprietary platform serves dozens of clients across the U.S., enabling 85% faster underwriting, a 32% increase in GWP per underwriter, and up to 700 basis points improvement in loss ratios.
For details, visit https://pibit.ai/

Technologies We Employ:

At the forefront of technological innovation, we harness the power of deep learning, machine learning, computer vision, NLP, and LLMs to drive transformative change.

Who We're Seeking:

We are in search of individuals who possess a deep passion for coding and problem-solving. As we pioneer game-changing technologies, we value individuals who embody the following qualities:

- Passionate about New Technologies: Embrace curiosity and thrive in an environment of continuous learning.
- Self-Starter and Team Player: Take initiative while collaborating seamlessly within a dynamic team environment.
- Goal-Driven and Hardworking: Demonstrate resilience and dedication towards achieving objectives.

Responsibilities:

At pibit.ai, we believe in autonomy and trust. As such, you will have the opportunity to take ownership of your work, free from micro-management. Your responsibilities will include:

- Taking complete ownership of projects, driving them from conception to delivery
- Collaborating effectively with cross-functional teams to tackle various technical challenges.

Technical Requirements:

- Proficiency with the PyTorch deep learning framework, LLM Tools, prompt engineering, etc.
- Strong understanding of computer vision or natural language processing (NLP) techniques and libraries such as NLTK or spaCy.
- Experience with developing and deploying machine learning models in a production environment.
- Familiarity with cloud computing platforms such as AWS or Azure.
- Solid understanding of software development principles and version control systems (e.g., Git).
- Experience with implementing research papers.
- Excellent problem-solving skills and the ability to analyze complex datasets.

*Onsite Opportunity (No Remote work available)

Join us on our journey to redefine the landscape of business operations through innovation and technological advancement. If you're ready to make an impact and thrive in a dynamic, forward-thinking environment, we want to hear from you.
