Job Description

Responsibilities

- Build timely workflows in the assistant to ensure that customer requirements to solve a use case are met
- Identify innovative solutions to customer problems and implement the same using our Generative AI, AI Agents.
- Analyze customer data and build/execute analysis reports to improve customer experience.
- Talk to customers to understand the solution they are looking for , define a scope and ensure that the scope is implemented with quality.

- Work with the internal engineering and business development teams, to research, solve, and enable customers to their full potential identifying newer capabilities we have to build on our Conversation AI platform.
- Aid in product design and product development as applicable.

Requirements

- Experience in software development technologies. Familiarity with web technologies & scripting languages (HTML, JS, Python in particular) is a strong plus.
- Ability to reason, think, and identify problems and work with teams to design, estimate & deliver a solution for the same.
- Excellent communication skills (both verbal and written) to converse with customers and the ability to capture knowledge into documentation & reference materials.
- A persistent learner with the ability to constantly learn and grow with the team.

If you meet the above requirements and are passionate about developing and maintaining Conversational AI Agents and Assistants with Enterprise Businesses and solving their problems using cutting-edge technologies, we'd love to hear from you.
Please submit your resume and any relevant work samples for consideration.

About Engati

Engati is a leading product platform in the customer experience domain. Engati is also a renowned chatbot platform in the world with a presence in 186 countries and over 30,000+ registered accounts. Headquartered in the United States, Engati has oces in Bangalore, Mumbai, California, and Philadelphia. Engati is also the winner of the 'Best AI-powered technology solution' as part of the CODiE Awards 2021.

As a Forward Deployed Engineer, your primary responsibility is to provide a world-class experience for our customers and partners, spearheading customer advocacy and allowing our customers to take full advantage of our product offerings. A Forward Deployed Engineer is at the forefront of driving sales by influencing solutions developed on our platform, managing and sustaining customer relationships through the implementation phase, and thus a brand ambassador for Engati.
